By the Numbers

- 90% Home: According to AARP, nearly 90 percent of people over age 65 want to stay in their own home as long as possible, and 80 percent believe they always will.
- #1 Falls: Falls are the leading cause of injury for older Americans, says the Centers for Disease Control and Prevention. There is a serious injury every 13 seconds from a fall, and every 20 minutes someone dies.
- 98 Million: There were 44.7 million Americans aged 65 or older in 2013. There will be roughly 98 million by 2060, more than twice that in 2013, according to the Administration on Aging.

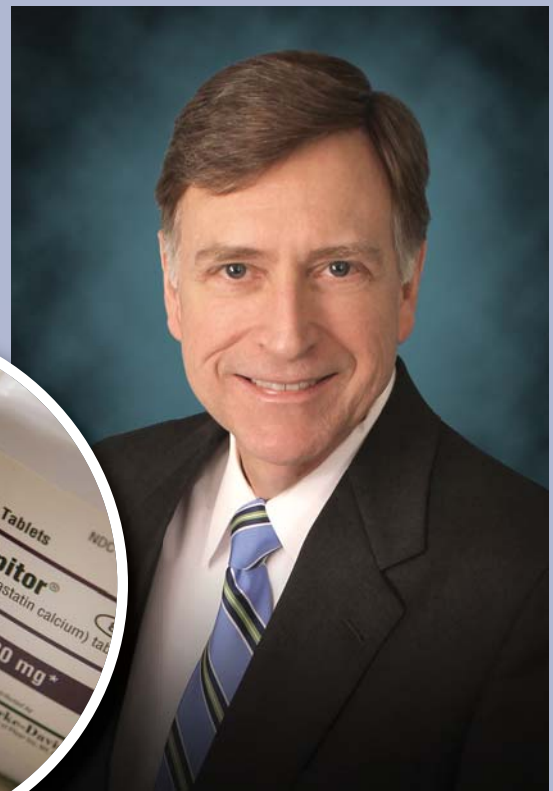

Practice Area Spotlight

Pharmaceutical Litigation

For many years at Bilbo Law Office we have represented people injured by prescription medications and we are currently investigating or actively pursuing the following pharmaceutical drug claims:

- Benicar – A high blood pressure drug that may cause spruce-like enteropathy; severe intestinal problems.
- Effexor – An antidepressant drug that may cause birth defects and suicidal behavior.
- Fluoroquinolone (Levaquin & Cipro) – Antibiotic drugs that may cause peripheral neuropathy; severe nerve damage.
- Lipitor – A high cholesterol drug that may cause type 2 diabetes.
- Onglyza – A diabetes drug that may cause heart failure and pancreatic cancer.
- Testosterone Replacement Therapy – A drug for low testosterone that may cause heart attacks and strokes.
- Xarelto – A blood thinner drug that may cause internal bleeding and hemorrhaging.
- Zofran – An anti-nausea drug that may cause birth defects.
